	A	B	C	D	E	F	G	H
	Place-Based Risk Factors (Specific Local Conditions)	Low Supervision or Guardianship	Policy	Environmental Design	Low Collective Efficacy	What will we achieve if we reduce this PBRF (short & long term)	Is it actionable? (Easy, Difficult but do-able, really hard?)	Really Hard? Why? Can we take steps to implement? Can we overcome barriers?
1	Garbage near Vietnamese restaurant and messy by dumpsters		X			Sends a message that we care about this place.	Yes	Not hard. Volunteers.
2	Donut shop: old gray banner, building looks old - not painted in years, stands out as old next to newer adjacent neighbors		X			Makes the area look more welcoming.	Yes	Volunteers
3	People are afraid to report crime: they don't care, language and cultural barriers, fear of SPD - past experience, people don't know each other				X	Will increase collective efficacy.	Hard	Longterm
4	Dark areas look abandoned - not visible to guards			X		Harder to commit a crime.	Yes	Depends on who has to pay
